Your Vision, Our Future

Endo**Therapy**<sup>™</sup>

# EZDilate<sup>™</sup> Multi-Stage Endoscopic Balloon Dilators

Transform your expectations.

## Accurate inflation that's true to specifications eliminates the need for overinflation

- Engineered to inflate precisely to the target diameter without the need to overinflate
- Fixed-wire and wire-guided balloons are available in 6 different balloon sizes with 3 possible diameters each, for 18 total options
- Only EZDilate balloons do not duplicate increments— to avoid repeating dilation as you progress in balloon size
- Robust nylon material disperses radial pressure along the full length of the balloon ensuring repeatable, reliable balloon dilation with minimal waisting

### Inflation Diameter Comparison (mm)

OLYMPUS	Competitor A	Competitor B
6, 7, 8	6, 7, 8	6, 7, 8
8.5, 9.5, 10.5	8, 9, 10	8, 9, 10
11, 12, 13	10, 11, 12	10, 11, 12
13.5, 14.5, 15.5	12, 13.5, 15	12, 13.5, 15
16, 17, 18	15, 16.5, 18	15, 16.5, 18
18, 19, 20	18, 19, 20	18, 19, 20

- Compatible with any 60 cc inflation device
- Glow-in-the-dark label contains essential size and pressure information right on the catheter

## EZDILATE THREE STAGE BALLOON DILATORS OFFER GRADUAL AND ACCURATE DILATION

Indicated for strictures throughout the GI tract—including dilation of the Sphincter of Oddi (Endoscopic Papillary Balloon Dilatation/EPBD).

EZDilate facilitates precise placement in the stricture due to its unique, patent pending centre marker as well as excellent visualisation through the balloon during dilation for improved monitoring of the stricture.

**FIXED WIRE:** indicated for dilation in the Oesophagus

**WIRE GUIDED:** indicated for dilation in the Oesophagus, Pylorus, Colon & Papilla

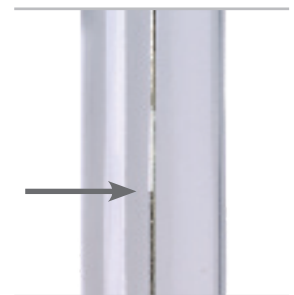

Offered in both FIXED WIRE and WIRE GUIDED designs, with sizes ranging from 6-7-8 mm to 18-19-20 mm

### Improves navigational efficiency while maneuvering through sensitive anatomy

- Slim catheter design enables rapid placement with less insertion force
- Soft, atraumatic tip designed to protect the working channel of the scope and help navigate through sensitive anatomy
- Preloaded removable .035" guidewire for dilations in the oesophagus, pylorus, papilla and colon
- Distal and proximal radiopaque markers provide fluoro-visualisation

### Ensures optimal placement and enhanced visualisation

- Only Olympus offers a centre visual demarcation on the balloon designed to improve positioning accuracy and assessment during dilation
- Rounded balloon shoulders and transparent material provide excellent, unobstructed visualisation of the stricture during dilation

## EZDilate™ Endoscopic Balloon Dilators

# Innovation that's a breakthrough from start to finish

- A significant innovation in balloon dilation designed based on physician feedback
- Slim catheter design and atraumatic tip improve navigational efficiency and help protect sensitive anatomy
- Centre visual marker designed to improve positioning accuracy and assessment during dilation
- Engineered to inflate precisely to the target diameter without the need to overinflate
- Meets exceedingly high standards for Olympus product and service excellence

Not all balloons are created equal.

Transform your expectations with Olympus today.

### EZDilate Fixed-Wire Balloon (1/bx): For Oesophageal Use

190 cm catheter length (P)

Part number	Inflated outer diameter (mm)	Inflation pressure (atm)	Balloon length (mm)
BD-400P-0880	6.0 - 7.0 - 8.0	2.0 - 5.5 - 9.5	90
BD-400P-1080	8.5 - 9.5 - 10.5	2.0 - 5.5 - 9.5	90
BD-400P-1380	11.0 - 12.0 - 13.0	2.0 - 3.5 - 5.5	80
BD-400P-1580	13.5 - 14.5 - 15.5	2.5 - 4.0 - 6.0	80
BD-400P-1880	16.0 - 17.0 - 18.0	2.5 - 4.0 - 5.5	80
BD-400P-2080	18.0 - 19.0 - 20.0	2.5 - 3.5 - 5.0	80

### EZDilate Wire-Guided Balloon (1/bx): For Oesophageal, Pyloric, Colonic and Biliary Use

240 cm catheter length (X), .035" guidewire compatible

Part number	Inflated outer diameter (mm)	Inflation pressure (atm)	Balloon length (mm)
BD-410X-0855	6.0 - 7.0 - 8.0	2.0 - 5.5 - 9.5	65
BD-410X-1055	8.5 - 9.5 - 10.5	2.0 - 5.5 - 9.5	65
BD-410X-1355	11.0 - 12.0 - 13.0	2.0 - 3.5 - 5.5	55
BD-410X-1555	13.5 - 14.5 - 15.5	2.5 - 4.0 - 6.0	55
BD-410X-1855	16.0 - 17.0 - 18.0	2.5 - 4.0 - 5.5	55
BD-410X-2055*	18.0 - 19.0 - 20.0	2.5 - 3.5 - 5.0	55

\*Indicated for oesophageal, colonic and biliary use only.

#### INFLATION DEVICE FOR ENDOSCOPIC BALLOON DILATION, SINGLE USE (1/BOX)\*\*

Part Number	Syringe Volume (cc)	Max Pressure (atm)
MAJ-1740	60	15

\*\* Optional Accessory – EZDilate Fixed Wire and Wire Guided Balloon dilators are compatible with any 60 cc inflation device.
